Bellabeat Case Study: FitBit Usage Analysis

This dashboard analyzes FitBit smart device usage data to uncover trends in activity, sleep, and engagement, informing marketing strategy for Bellabeat's Leaf tracker. Explore the Activity, Sleep, and Engagement pages for detailed findings.

33
Total Users

24 of 33 users track sleep (73%)
Sleep Data Available for 24 IDs

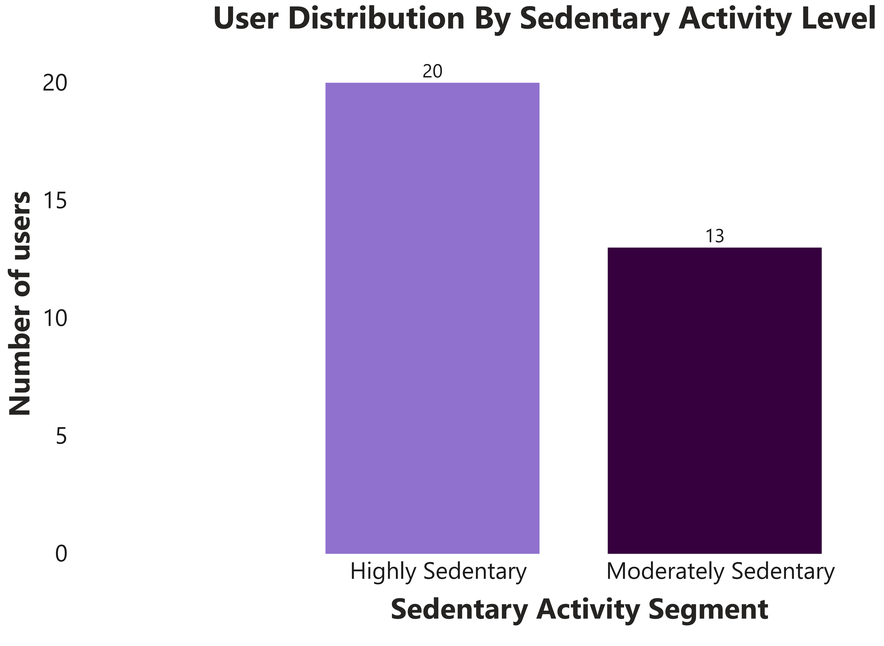
Steps Calories Correlation
Steps vs. Calories:
r = 0.59 (moderate positive)

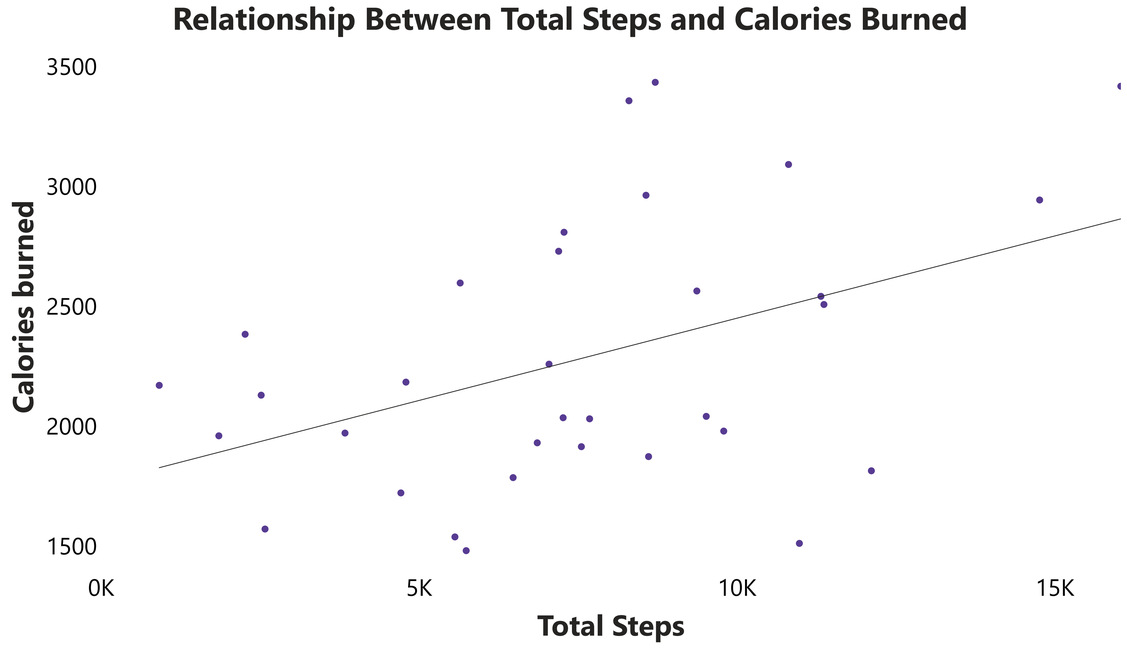
Steps alone don't fully explain calories burned — Leaf's activity intensity tracking offers insight beyond simple step counts.

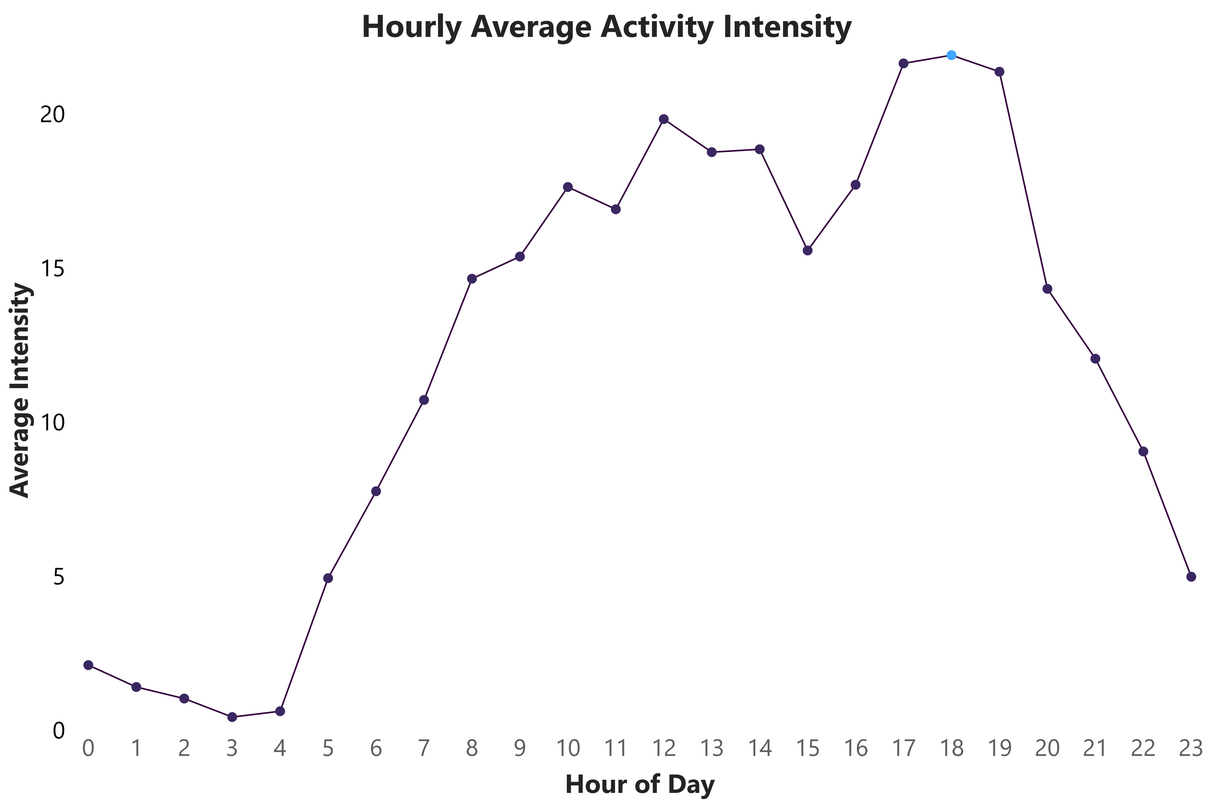
Resting HR Correlation
Resting HR vs. Activity:
r = -0.69 (strong negative, n=14)

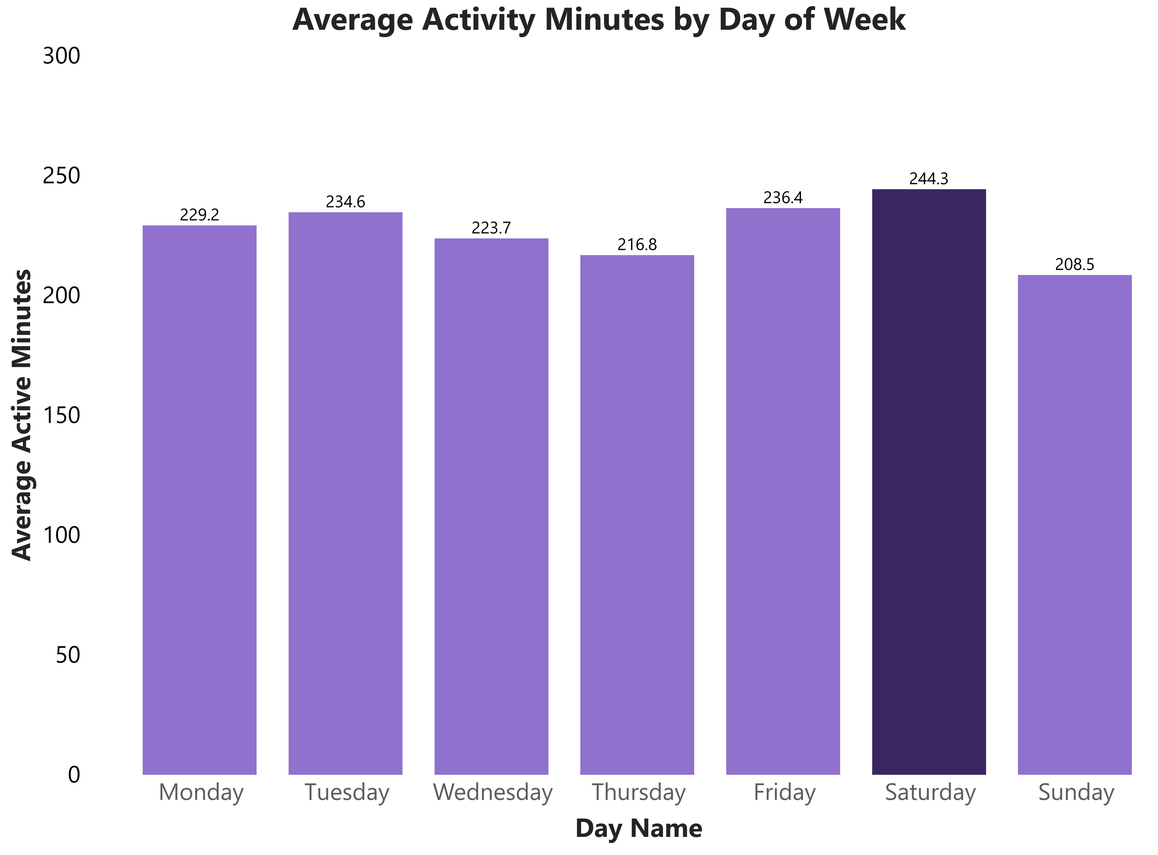
More active users show meaningfully lower resting heart rates — Leaf's fitness tracking reflects real cardiovascular benefit

Activity Pillar: Trends in Daily Movement and Intensity

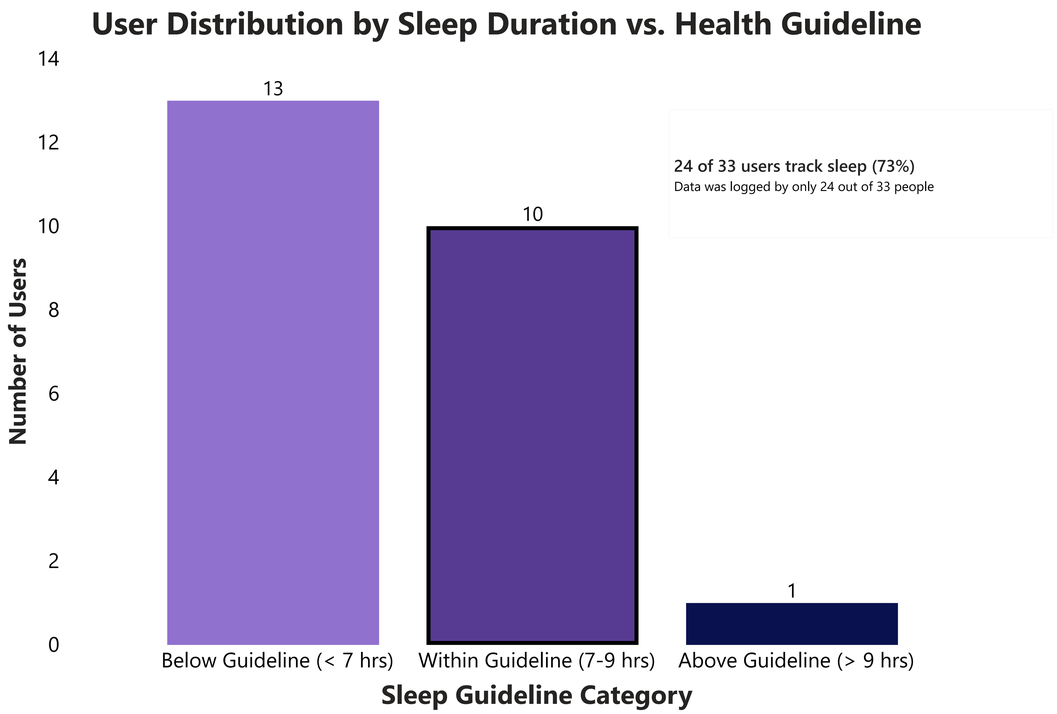


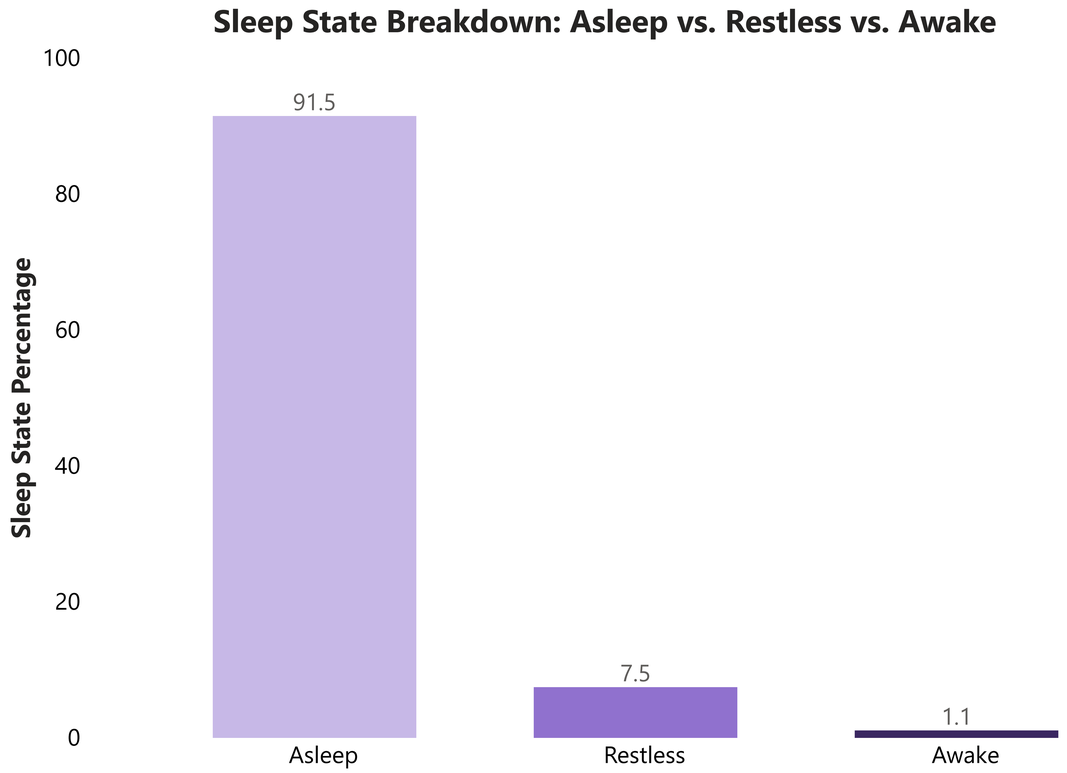


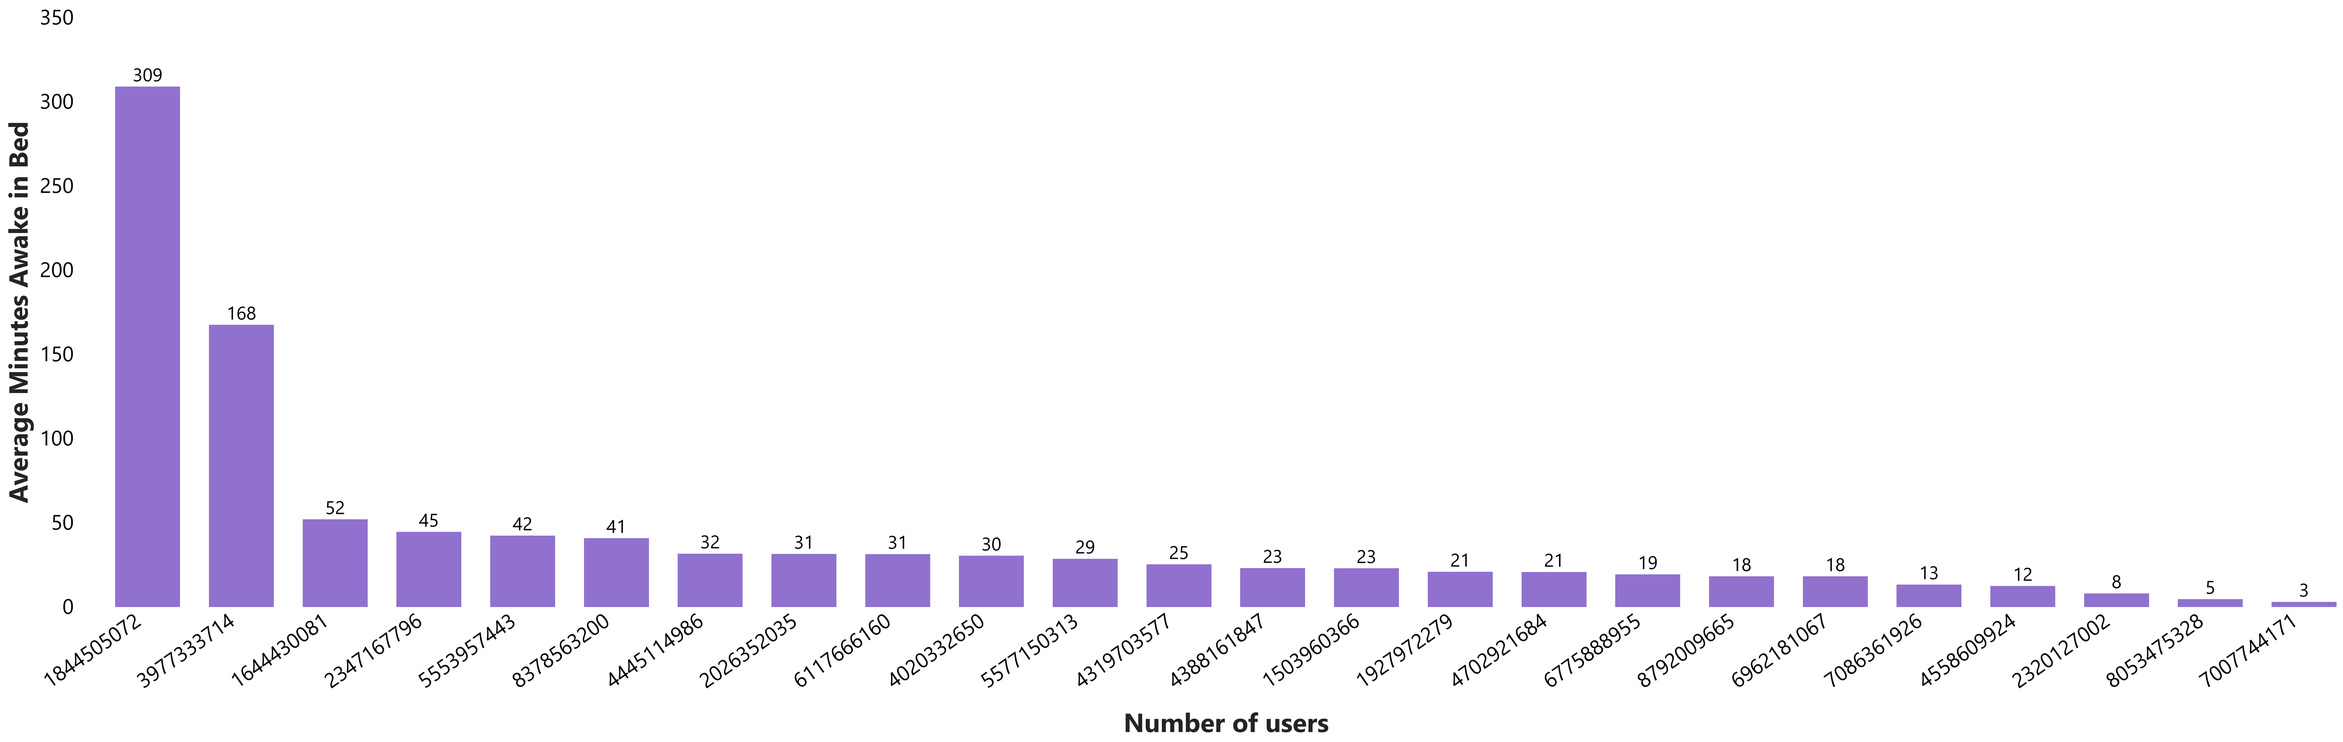




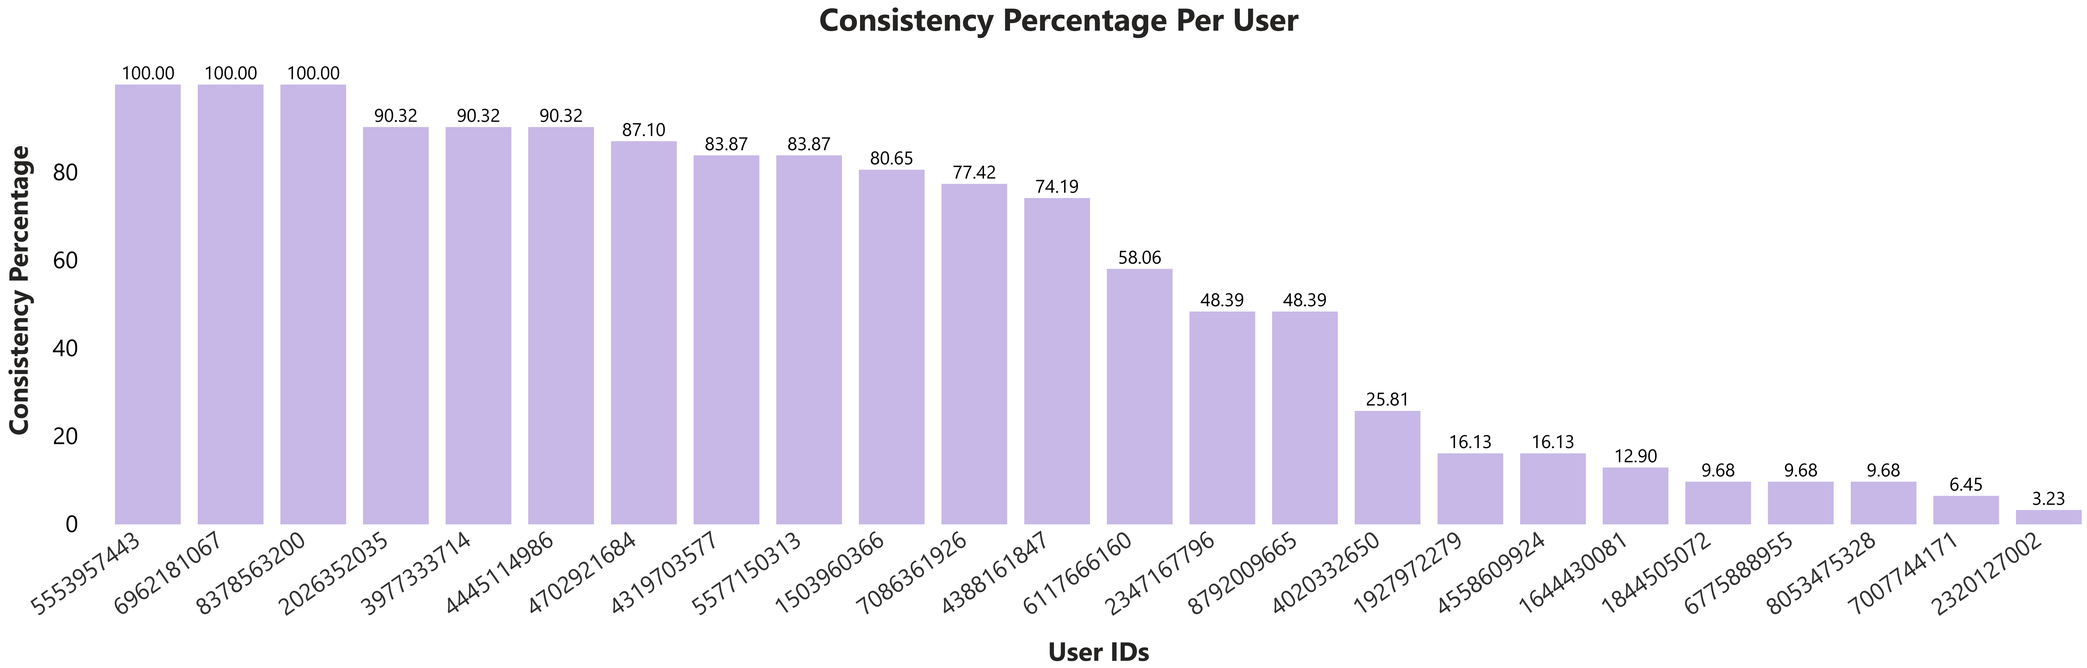
Sleep Pillar: Duration, Quality, and Restlessness Patterns

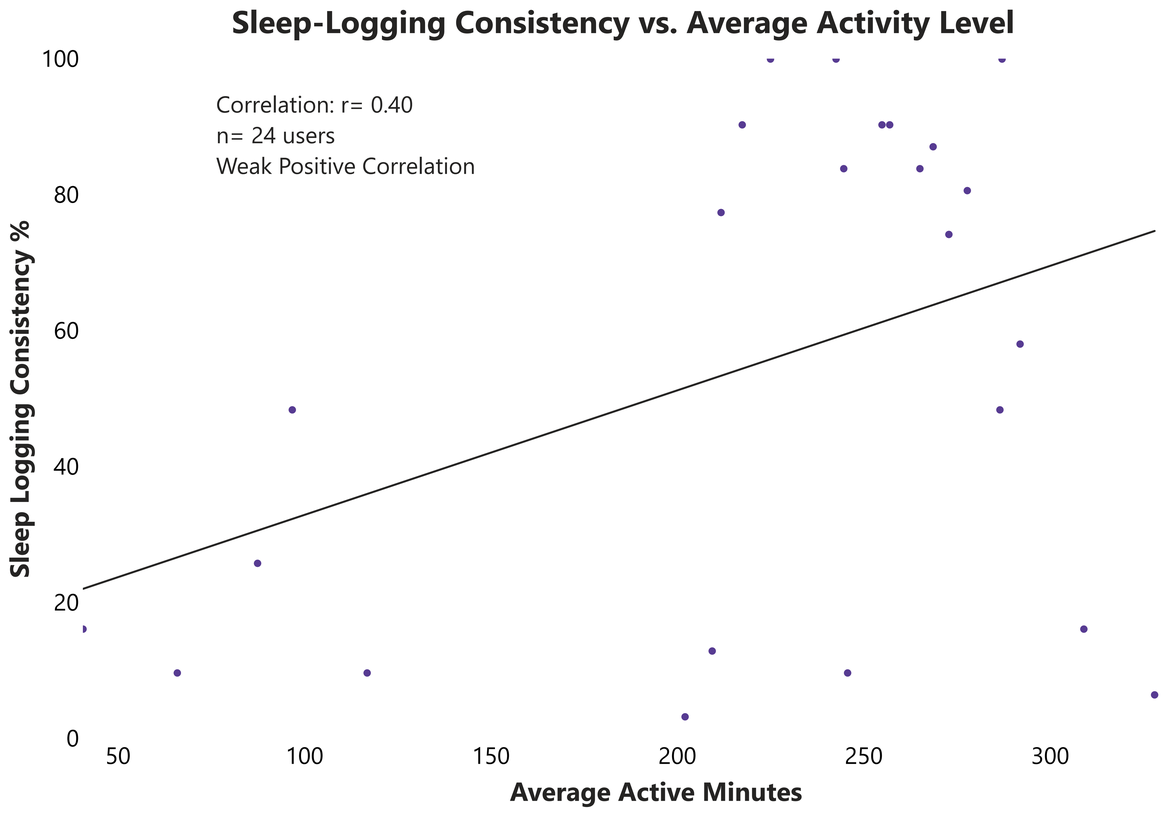


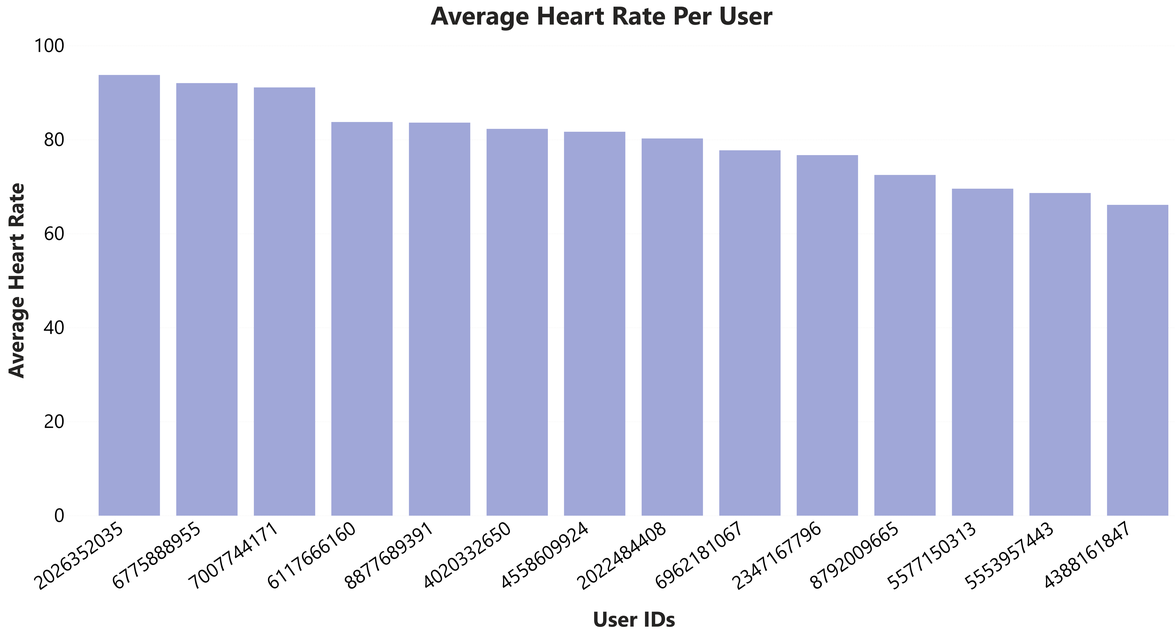


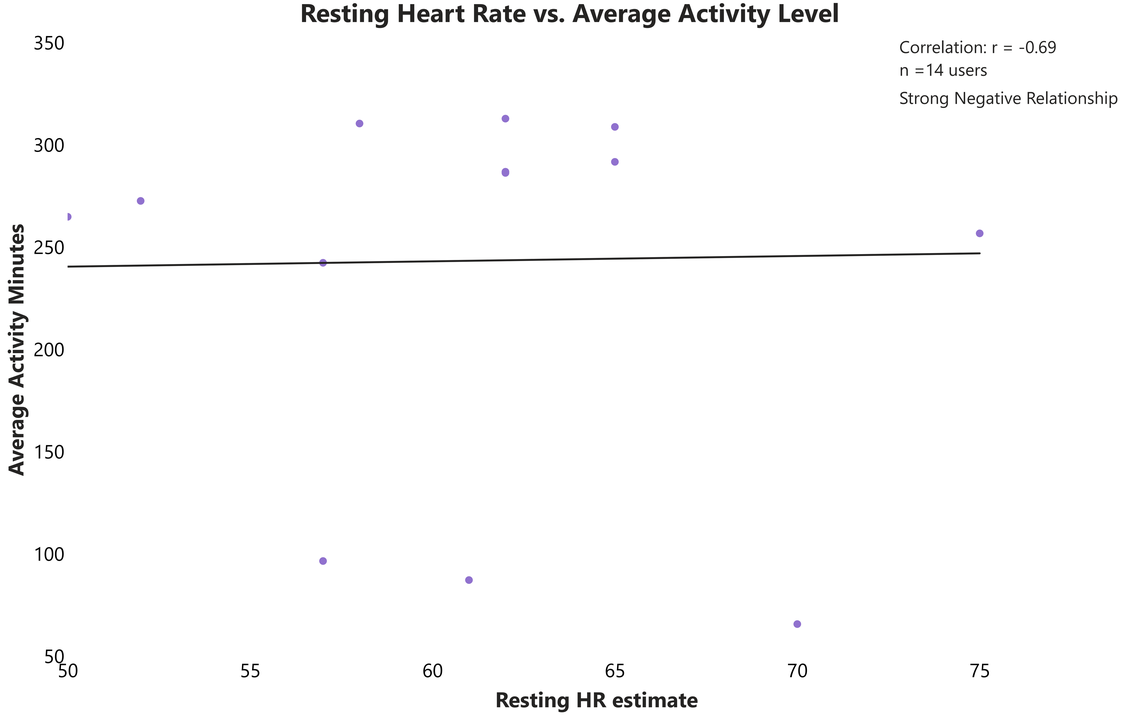


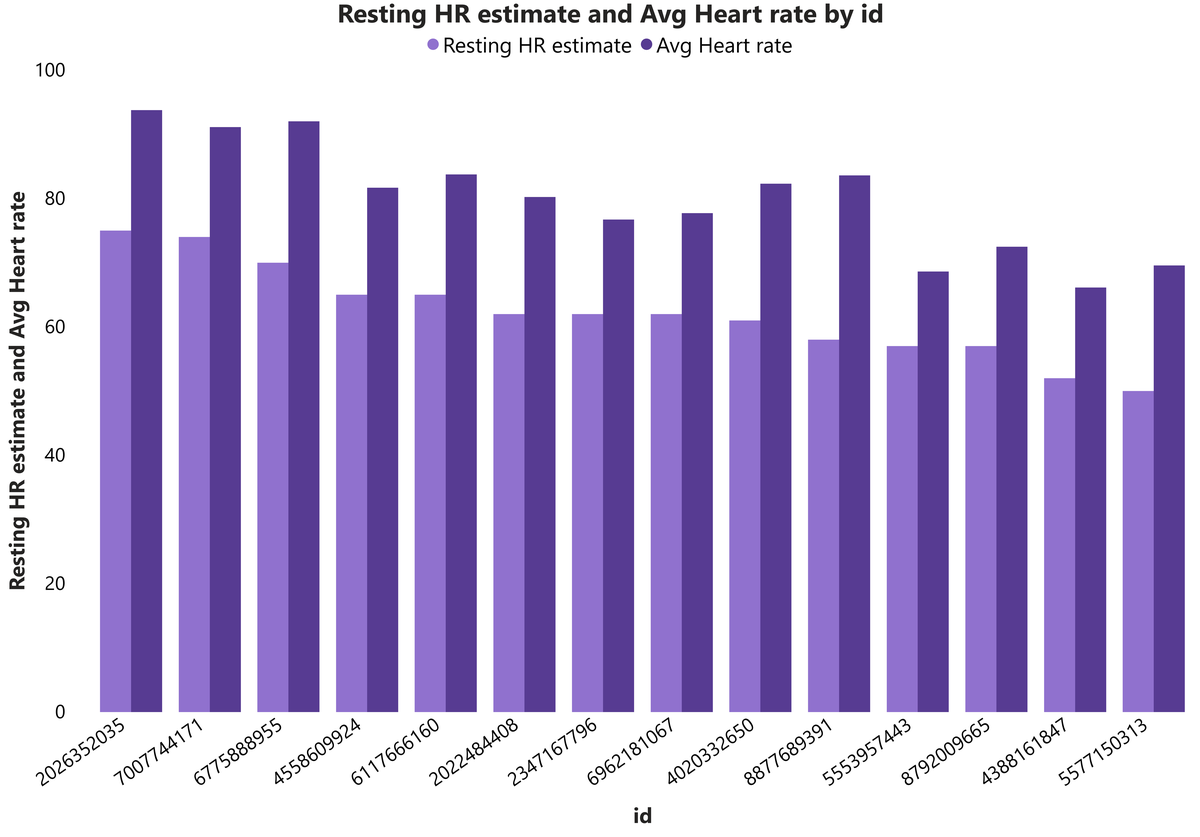
Engagement Pillar: Tracking Consistency and Activity Correlation











Heart Rate Deep-Dive: Resting HR and Fitness Correlation
